Schwab Wants No Airing

SAYS TRUST CORPO- RATIONS ARE SACRED

And Their Accounts Should Not be Exposed; How the Octupi Works

Washington, D. C., May 13.—When asked in detail for the plan of management of the various companies combined in the steel company, Mr. Schwab said it was the purpose of the parent company to control the subsidiary organization in harmony but this was to be done by indicating the officers of the various concerns. "There may not be so many names of influence on the boards," he said, "but the management will be efficient."

Mr. Schwab excused himself from speaking concerning the details of the organization of his company, once or twice saying that questions concerning capitalization, premiums, etc., should be asked of Mr. Morgan. "I don't know the steel trust," he said, when someone so designated his company. In a recent way he would say that the company is organized upon the same plan as the federal steel company, but he did not consider the company over capitalised. He said the assets of each of the subsidiary companies had increased in value since their organization, and that the popular estimates did not place a sufficient value upon the mines owned by the company. He also stated in this connection that the company owns sixty thousand acres of land in the coal fields of Pennsylvania and that in its iron mines there are 50,000,000 tons of ore in sight. He thought a reasonable profit on this ore would be \$2 per ton. Asked how long he thought these mines would be able to meet the demand, Mr. Schwab placed the limit on the iron ore at 20 years and on the coal at sixty. Each of the constituent companies, he said, makes its own purchases and its own sales. "In a word," he said, "the United States Steel Corporation is a clearing house to which its constituent companies go for information."

He admits that the company sells many of its products at a lower price in foreign markets than at home, saying that this practice is followed to hold the markets.

The witness discussed the relation of the tariff to the steel industry at length, but he said that upon the whole he did not desire to have the tariff changed in any respect.

Considering it entirely satisfactory as at present arranged, asked for his opinion as to the effect of the enactment of the Babcock bill taking the duty off trust produced articles, Mr. Schwab expressed an opposition to it. He did not consider as possible an international iron and steel combination regardless of all tariff restrictions.

Discussing the relation of capital to labor, he said that while he would not undertake to outline the future policy of the steel corporation, he did not endorse the policy of the labor organization as in the interest of the laboring man himself. He did hope, however, to see some arrangement that would share in the profits of the enterprise. Instead of being a detriment, he considered the big corporations as affording the best openings for labor and enterprise. "There were never such opportunities for brains as today," he said. "If I were a laboring man, as I once was, I should not want to belong to a labor organization employed by a properly managed corporation, like the steel company, for I would not want to be put on a level with the poorer workmen in the extreme. The tendency is to give the highest possible price for proper services, and no member of a labor organization is in a position to avail himself of such disposition."

He said the average wages paid now by the steel companies is higher than previous to 1892. The question was not one of wages, but of the management of business, with which the labor unions wanted to interfere.

Mr. Schwab expressed himself as opposed to the publicity of the accounts of corporations, and said he had no explanation to suggest for the regulation of corporations.

In conclusion, Mr. Schwab said he could see nothing but good to result from business combinations. He considered them of value both to the investor and to labor and thought they were calculated to extend business.

If people only knew what we know about Kodol Dyspepsia Cure, it would be used in nearly every household, as there are few people who do not suffer from a feeling of fullness after eating, belching, flatulence, sour stomach or water-brash, caused by indigestion or dyspepsia. A preparation such as Kodol Dyspepsia Cure, which, with no aid from the stomach, will digest your food, certainly can't help but do you good.

Meeting of the Oklahoma Press Association.

The annual meeting of the Oklahoma Press association will be held at Blackwell, Okla., on Tuesday, May 21, for the purpose of transacting such business as may properly come before the association.

This meeting of the association promises to be one of the most important to newspaper publishers ever held in its history and every newspaper publisher and editor is urged to be present. The glad hand of welcome is extended to all, whether active members or not. We want to make the newspaper fraternity of Oklahoma a mutual benefit association, whereby the business of publishing a newspaper may be a profitable one, and no other way is more prudent than a compact and well regulated organization of those interested in the business. Therefore, it is hoped that

Officers Have Fierce Fight With Outlaws at Jasper, Ind.

Jasper, Ind., May 13.—In a desperate battle with a deputy sheriff George Reeves was shot to death last night near Huntington, while being taken from the Jeffersonville reformatory to Jasper, where he and his brother John were to be placed on trial for a murder committed sixteen years ago. Sheriff Gastrop arrived in Huntington with the prisoners in custody at 8 o'clock this evening. The company with the deputy sheriffs, George Gastrop, and John Hunter the prisoners were started in a carriage to Jasper.

By the time the carriage reached a point three miles from Huntington the prisoners had quietly worked the handcuffs from their wrists and as the carriage started to cross Patoka river bridge both men sprang to their feet and leaped from the carriage. John Reeves was quickly overhauled, bound and again placed in the carriage. Deputy Sheriff Hunter followed in pursuit of George Reeves. He fired twice from a rifle at the fleeing prisoner without effect. The latter finally making an attempt to climb a steep embankment to get into a dense wood. Here the deputy overtook him and a hand to hand battle ensued. Reeves using his handcuffs, which were still fastened to one wrist, in an endeavor to dash the sheriff's brains out.

Hunter, feeling that Reeves was about to get the better of him, made a final struggle and succeeding in throwing off his adversary's hold and he reached for the revolver he carried in a rear pocket. Grappling the weapon he leveled it full at Reeves breast and shot him through the heart.

The Reeves were to be tried in Jasper for the murder of two deputy sheriffs John E. Gardner and William Cox, on the morning of June 18, 1885. It is alleged, they conspired after committing the crime and were not recaptured until several months ago, when they were arrested in Illinois. Before being brought to Indiana they were incarcerated in jail here charged with arson and bank robbery at Birds Eye, Ill., and that at this time they secured \$2,000 which they blew open the safe at, securing its contents five apiece and a lost destroyed the little town.
